

202B EGG WASHER

Features

- ◆ Made of high quality stainless steel for great durability and hygiene.
- ◆ Suitable for pre-washing before separation of chicken eggs, or cleaning and drying for duck eggs and preserved eggs.
- ◆ Includes water bath loading, washing, drying, candling, and an optional manual collection conveyor with a capacity of 10,000 eggs/hour.
- ◆ Pour the whole tray or box of eggs into a water bath, and the eggs will be transported into the washing system that follows the conveyor. This loading method not only saves time but also minimizes cracked shells by using buoyancy. Furthermore, eggs are also easier to wash after running through a water bath.
- ◆ The eggs will be cleaned by brushes and warm water (a water heater isn't included in the price, consult our representatives if there are any queries).
- ◆ Water on eggs will be swept off by the drying brushes while the eggs themselves are dried by the drying fan system, the drying rate can reach up to 95-99% depending on the environmental humidity.
- ◆ Can be connected with ZENYER 104B egg grader main machine to assemble a duck egg processing line, alternatively, connect with a ZENYER 501B egg separator to assemble a liquid egg processing line with a capacity of 8,000 eggs/hour.

Model	ZYX-YS1-3-(P)
Product code	202B
Capacity	10,000 eggs/hour
Power	11.85 KW, 50 HZ
Voltage*	380V-415V,3-phase
Dimension (L*W*H)	12.3*2.3*1.1 M
Net weight	850 kg
Gross weight	1210 kg
Function	Water bath loading, washing, drying, candling, and optional manual collection conveyor
